(\*) : please confirm at each location as results may vary at different locations

*Rosette Free Lisianthus seedling have the ability of a high rate of bolting even under high temperature conditions, without pre-cooling treatment*

## Varieties

## The 3 benefits

1

Expanded use

2

Increased profitability

3

Reduced production cost

- *Possible to raise seedlings and transplant even under hot temperature conditions*
- *Makes more number of salable cut flowers*
- *Do not require such pre-cooling and cooling treatments*
- *Earlier growing speed of second flush*

*\*Rosette may occur under extremely stressed conditions*

Sakata Seed Corporation has obtained the exclusive right of use for the patented technologies below.

Right holder (applicant): YISSUM RESEARCH DEVELOPMENT COMPANY OF THE HEBREW UNIVERSITY OF JERUSALEM LTD. (Israel)

# A-Primax seeds

- Primax seeds are expected to have improved germination **vigor** and **plug uniformity** in stressful environments compared to regular pellets
- Among them, A-Primax is more **eco-friendly** than the current Primax as it does not undergo thiram treatment
